PROFILE

QA Lead with 6+ years of testing web applications, APIs and complex engineering systems in B2B Oil and Gas tech. I lead a QA team, build testing processes, introduce automation and quality metrics. I have worked with microservice architecture and critical data: geology, drilling, oil fields. My focus is product stability, shorter time to market and growing the QA function in the company.

Full time, part time or project work · hybrid or remote

EXPERIENCE · 8 YEARS 6 MONTHS

Aug 2024 – present

QA Lead · ROGII Europe

Software development, system integration, IT consulting

Lead the QA function for a microservice product with thousands of users and critical drilling and field data.

Team

- Manage the QA and QA automation team
- Run technical interviews, onboarding and growth of specialists
- Coordinate regression, releases and feature acceptance

Process and quality

- Built QA processes with transparency, control and metrics
- Introduced quality metrics to track release stability
- Take part in roadmap planning, flag quality risks and influence release dates
- Work with the business and join quarterly strategy meetings
- Reduced the risk of critical defects reaching production

Automation

- Introduced regression automation with TypeScript and Playwright
- Introduced load testing with k6 and performance monitoring

AI

- Built QA Assistant, an internal tool with 20+ modules: requirements analysis, test cases and checklists, bug reports, test data, autotest generation
- Automated routine work: feature flag collection, release notes, data handling
- Rolled the tool out to QA and neighbouring teams

SKILLS

Leadership

QA strategy · Test planning · Quality metrics · Risk-based testing · Team management

AI and automation

AI agents · Playwright · TypeScript · k6 load testing · GitLab CI · Jenkins

Soft skills

Tech interviews · Mentoring · Performance reviews · Roadmap and strategy · Agile and Scrum

Hard skills

REST · Postman · gRPC · SQL · PostgreSQL · Jira · TestRail · Grafana

LANGUAGES

Russian — Native
English — B1 · Intermediate

EDUCATION

Ufa State Aviation Technical University
Faculty of Informatics and Robotics · Business Informatics

Mar 2023 – Aug 2024

QA Lead, player coach · Tensor

Software development · tensor.ru

QA Lead on a high load system: monolith plus microservices, thousands of users.

Leadership

- Led a team of QA specialists
- Planned testing, assigned tasks, controlled deadlines
- Ran performance reviews and onboarding

Quality

- Kept releases stable under high load and frequent delivery
- Took part in every stage from requirements to release
- Tested web, API and integrations

Results

- Optimised test documentation and regression
- Improved release stability and reduced team load
- Influenced release dates when quality was at risk

Apr 2021 – Mar 2023

QA Engineer · Tensor

Software development · tensor.ru

Functional, integration and regression testing in a high load product with frequent releases.

- API and external integration testing
- Requirements analysis and test design
- Logs, bug reports and release participation

Jun 2018 – Apr 2021

Lead Client Manager, B2B Oil and Gas · VARK LLC

Full cycle B2B projects with large clients, including Rosneft.

- Worked with technical documentation: specifications and GOST standards
- Coordinated the client and internal teams
- Took part in a CRM rollout and business process optimisation

2014 · incomplete higher education
